

Native text PDF document containing pure digital vector text without embedded raster images.
This document is used to verify deterministic parser routing and preflight checks.
Preflight analysis must detect sufficient native text characters on this page.
The low_text flag must evaluate to False and has_visual_content must evaluate to False.
Routing selects native_or_rapidocr with native_text_sufficient reason.
Local candidate quality inspector will reject non-OCR candidate with incomplete_or_non_ocr.
